ELSEVIER

Comput. Methods Appl. Mech. Engrg. 117 (1994) 447–448

Computer methods in applied mechanics and engineering

Contents Volume 117

Volume 117, Nos. 1–2, July 1994

Boundary element solution for steady and unsteady Stokes flow
Y. Abousleiman and A.H.-D. Cheng 1

Parallelizable block diagonal preconditioners for the compressible Navier–Stokes equations
L.C. Dutto, W.G. Habashi and M. Fortin 15

Application of polycrystal plasticity to sheet forming
A.J. Beaudoin, P.R. Dawson, K.K. Mathur, U.F. Kocks and D.A. Korzekwa 49

A spectral algorithm for the Stokes problem in vorticity–vector potential formulation and cylindrical geometry
R. Pasquetti and R. Bwemba 71

Applications of a generalized complementary energy principle for the equilibrium analysis of softening structures
S. Plaxton and J.E. Taylor 91

High-temperature bending, buckling and postbuckling of laminated composite plates using the natural mode method
J. Argyris and L. Tenek 105

Efficient sensitivity analysis for structural optimization
U. Kirsch 143

Efficient analytical integration of symmetric Galerkin boundary integrals over curved elements; elasticity formulation
C. Balakrishna, L.J. Gray and J.H. Kane 157

Computation of cross coupling stiffness in a whirling pump
H.G. Wood III and A.A. Thaker 181

Extending substructure based iterative solvers to multiple load and repeated analyses
C. Farhat, L. Crivelli and F.X. Roux 195

Finite element derivative recovery by moving least square interpolants
M. Tabbara, T. Blacker and T. Belytschko 211

On the limitations of bubble functions
L.P. Franca and C. Farhat 225

Volume 117, Nos. 3–4, August 1994

Non-linear stiffnesses in analysis of planar frames
Y.-B. Yang and L.-J. Leu 233

Techniques for stress- and strain-controlled homogenization of inelastic periodic composites
C.C. Swan 249

Three-dimensional vortical flow past bodies of revolution with conical afterbodies
H. Miyata and N. Ogawa 269

A new class of multilevel decomposition algorithms for non-monotone problems based on the quasidifferentiability concept
G.E. Stavroulakis and P.D. Panagiotopoulos 289

Finite element analysis of transient creep problems
J.N.C. Guerreiro and A.F.D. Loula 309

Three-dimensional stress analysis of orthotropic and cross-ply laminated hollow cylinders and cylindrical panels
J.Q. Ye and K.P. Soldatos 331

Semi-discrete and fully discrete Galerkin methods for the vibrating Timoshenko beam
B. Semper 353

An explicit hybrid-stabilized 9-node Lagrangian shell element
K.Y. Sze 361

Large deflection analysis of plates under thermal loading
R.M. Lin, M.K. Lim and H. Du 381

Semi-implicit Taylor–Galerkin finite element methods for incompressible viscous flows
B. Tabarrok and J. Su 391

Explicit interpolation formulas for the Bell triangle
M. Okabe 411

Aspects of conservation in finite element flow computations
P. Hansbo 423
